

# Use of Garageband in Music Therapy

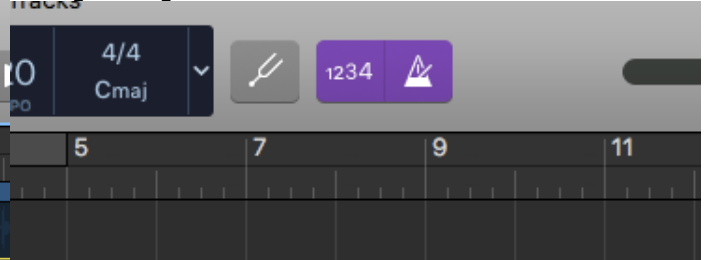

## 1. Getting Started

1. Open garageband (Your last project will come up automatically. Be mindful of confidentiality)

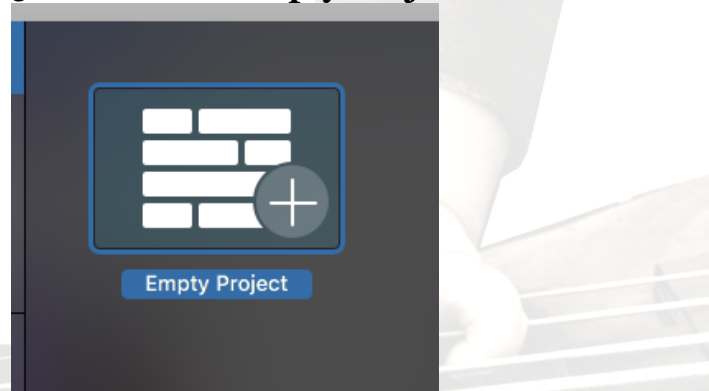

2. Menu: File: New File (top left)

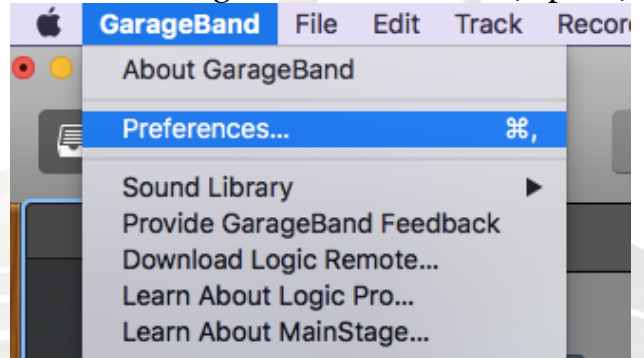

5. Click to turn off the count in and metronome (Purple, top middle)

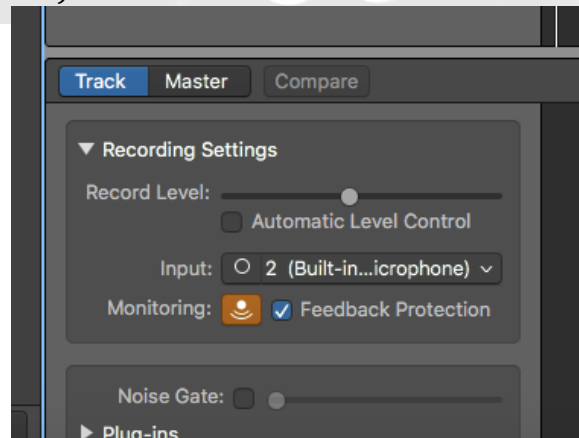

3. Double Click **Empty Project**

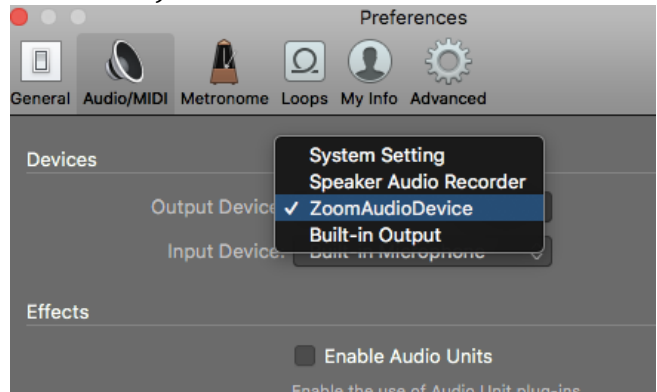

6. Menu: Garageband: Preferences (top left)

4. Click to turn off the **Monitor** (Orange bottom left)

7. Audio/midi: output: ZoomAudioDevice, Built-in-Output (the computer speaker), or your Bluetooth (recommended, will show up when connected)

## Getting started continued

For sharing on zoom:

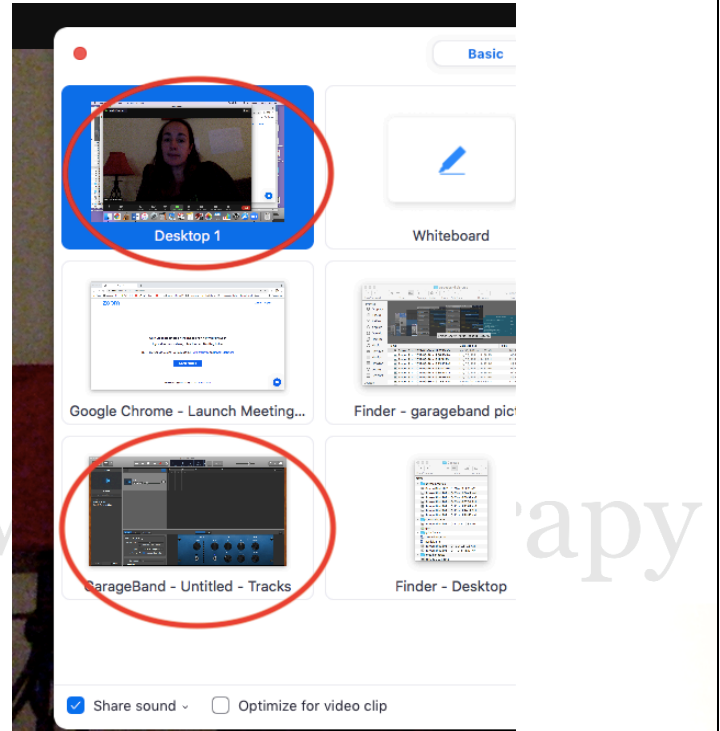

1. have garageband open and ready
2. Click: share screen (green bottom middle)

3. Click: share sound (blue bottom left)

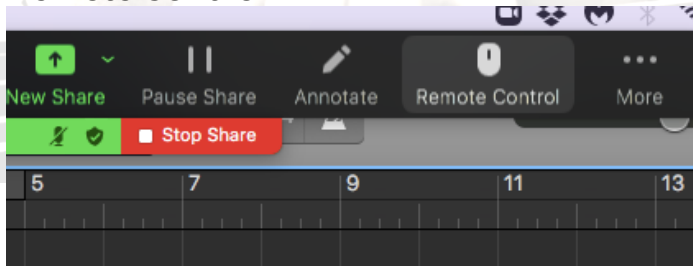

4. Double click on Garageband or Desktop if you want to share the entire screen.

To give the client Remote Control.

1. Hover the cursor at the top of the screen until you see the zoom bar come down and click **Remote Control**

2. Click on the client's name to allow them to control your screen. (This does not work on all devices, so client's names may not show up. It's my name because I joined the meeting on my iPad as a guest)
